- Acremonium kiliense*, 5.8S and ITS2 rDNA RFLP patterns of isolates of, 70
- Acremonium obclavatum*, 5.8S and ITS2 rDNA RFLP patterns of isolates of, 70
- Acremonium strictum*, 5.8S and ITS2 rDNA RFLP patterns of isolates of, 70
- Aeromonas* spp., *Dreissena polymorpha*, pathogenic for, 19
- Agrobacterium tumefaciens* RS5, cryptic haloalkanoic acid dehalogenase from, 96
- 2-Aminofluorene, as substrate for *N*-acetyltransferase activity in *E. coli*, 125
- Aminoglycosides, effect of environmental conditions on *in vitro* activity of against *E. coli*, 212
- 5-Aminoarotic acid derivatives, antibacterial activity of, 245
- Amphibacillus xylanus*, role of cysteine and histidine residues in ATPase activity of, 9
- Anacystis nidulans*, bidirectional hydrogenase genes and diaphorase subunit HoxU in respiration of, 253
- Aphytis*, distribution of *Wolbachia* in ovaries and eggs of, 1
- Arylamine, effect of NAT in *P. aeruginosa* on, 353
- Arylamine *N*-acetyltransferase activity, in *E. coli*, 125
- Azithromycin, 50S ribosomal subunit formation in *S. aureus* inhibited by, 119
- Azospirillum brasilense* Sp7, sequencing and functional analysis of indole-3-pyruvate decarboxylase gene from, 327
- Azospirillum* spp., cell-surface lectins of, 241
- Bacillus* sp., biotransformation of 2,4,6-trinitrotoluene by, 45
- Bacillus sphaericus*, small acid-soluble spore proteins and spore properties in, 220
- Bacillus sphaericus* binary toxin, sandwich enzyme-linked immunosorbent assay for, 152
- Bacillus subtilis*  
effect of osmotic stress on envelope composition of, 55  
osmotic strength blocked stage II sporulation of, 75
- Bacillus thuringiensis* crystal toxicity, for Indianmeal moth synergized by spore coat protein, 278
- Bacillus thuringiensis* *d-endotoxins*, toxicity to *Perileucoptera coffeella* of, 175
- Bacillus thuringiensis israelensis*, small acid-soluble spore proteins and spore properties in, 220
- Bacillus thuringiensis* strains, cry-like genes in, 232
- Bacteroides ovatus* V975, fermentation of brans by, 90
- Biodegradation, of ethylene glycol contaminated soil, 136
- Biofilms, effect of chlorhexidine gluconate on bacteria in, 13
- Bioremediation, of TNT aerobic bacteria, 45
- Botulinum neurotoxin* gene clusters, of *C. botulinum* type A(B) strain, gene organization and sequence of, 226
- Buchnera aphidicola*  
characterization of cell division gene of, 85  
sequence analysis of DNA segment from, 158
- Buchnera endosymbionts*, numbers of plasmids containing leucine biosynthetic genes in, 238
- Candida* species, sequence analysis of internal transcribed spacer 2 (ITS2) from, 63
- Carboxy-terminally amidated peptides, effect of serine carboxypeptidase from *Paecilomyces carneus* on oligopeptides containing, 41
- Cell volume, comparison of cell lysis methods and protein assays in determining, 131
- Chlorhexidine diacetate, effect of *Streptococcus bovis* JB1 and ruminal microorganisms, 348
- Chlorhexidine gluconate, effect on multispecies biofilms, 13
- Clarithromycin, 50S ribosomal subunit formation in *S. aureus* inhibited by, 119
- Clostridium acetobutylicum* ATCC 824, complementation of *E. coli* polypeptide deformylase mutant with gene from, 248
- Clostridium botulinum* type A(B) strain NCTC 2916, gene organization and sequence determination of BoNT gene clusters of, 226
- Clostridium perfringens*, cell lysis and protein measurement methods of determining cell volume of, 131
- Clostridium* strains, cry-like genes in, 232
- Cold shock, *cspA* gene in *Salmonella enteritidis* after, 29
- Cowpea miscellany *Rhizobium* spp., *nodABC-lacZ* fusion determines host specificity of, 361
- Cry genes, in *B. thuringiensis* and *Clostridium* strains, 232
- Cryptic haloalkanoic acid dehalogenase, from *A. tumefaciens* RS5, sequence analysis of, 96
- CS7.4 cold shock protein, in *Salmonella enteritidis*, 29
- CspA* gene, in *Salmonella enteritidis* following cold shock, 29
- Cysteine residue, role in ATPase activity of *Amphibacillus xylanus*, 9
- Cystic fibrosis, complementation of methionine auxotrophs of *Pseudomonas aeruginosa* from, 190
- Cytokines, *Porphyromonas gingivalis* biofilm degradation of, 216
- Deformylase, in *C. acetobutylicum* shares operon with formyltransferase, 248
- Dental plaque, grown as biofilm on dental amalgam with and without sucrose, 13
- Desulfovibrio carbinolicus*, anaerobic degradation of glycerol by, 283
- Desulfovibrio fructosovorans*, anaerobic degradation of glycerol by, 283
- Diaphorase subunit *hoxU*, in respiration of *Anacystis nidulans*, functional analysis of, 253
- Diethyl pyrocarbonate, ATPase activity of *Amphibacillus xylanus* inactivated by, 9
- Dihydroorotase, antibacterial activity of 5-aminoarotic acid derivatives toward, 245
- Diuraphis noxia*, leucine gene plasmid copies in *Buchnera endosymbionts*, 238
- Dreissena polymorpha*, pathogenicity of *Aeromonas* spp. to, 19
- Electromagnetic fields, MS2 bacteriophage replication cycle altered by, 298
- Encapsulation, in *Pasteurella multocida*, relationship with lipoprotein content, 274
- Enterococcus hirae*, role of H<sup>+</sup>-translocating ATPase in K<sup>+</sup> uptake in, 114
- Enterococcus* species, identified by randomly amplified polymorphic DNA (RAPD), 332
- Environmental conditions, effect on *in vitro* activity of antimicrobial agents against *E. coli*, 212
- Enzyme-linked immunosorbent assay (ELISA), for toxicity of *Bacillus sphaericus* binary toxin, 152
- Erwinia herbicola*, phosphate starvation and low temperature induces ice nuclei expression in, 370
- Escherichia coli*  
arylamine *N*-acetyltransferase activity in, 125  
*C. acetobutylicum* gene complements polypeptide deformylase mutant of, 248  
effect of environmental conditions on activity of antimicrobial agents against, 212  
role of *lacY* gene product in induction of IPTG inducible promoters studied in, 341
- Ethanol, effect on permeability and  $\beta$ -galactosidase activity of *S. thermophilus* and *L. delbrueckii* subsp. *bulgaricus*, 202
- Exopolysaccharide, localized on plasmid in *Rhizobium* sp S<sub>2</sub>, 36

- F<sub>0</sub>F<sub>1</sub>*, role in K<sup>+</sup> uptake of *Enterococcus hirae*, 114
- Filth flies, enteric bacteria in greyhound kennels spread by, 164
- Flow cytometry, bacteriocin-induced injury to *Listeria monocytogenes* shown by, 266
- Formate dehydrogenase activity, effect of molybdenum and tungsten on, 337
- Formyltransferase, in *C. acetobutylicum* shares operon with formyltransferase, 248
- French press treatment, *Clostridium perfringens* cell volume determined by, 131
- ftsZ* gene, of *Buchnera aphidicola*, characterization and detection of protein of, 85
- Giardia muris*, in environmental waters, immuno-PCR amplification methods for detection of, 107
- Glucosyltransferase, of *Streptococcus mutans*, effect of EEP on, 24
- Glycerol, *D. fructosovorans* and *D. carbinolicus* anaerobic degradation of, 283
- Glycol-contaminated soil, microbial growth in steady-state model of, 136
- Greyhound kennels, flies and bacteria in, 164
- Hemin, hemoglobin binding by *Porphyromonas gingivalis* regulated by, 102
- Hemoglobin binding, by *Porphyromonas gingivalis*, hemin regulation of, 102
- HhaI* digestion, of PCR-amplified 16S rDNA, role in separating *Photobacterium* and *Vibrio* strains, 171
- Histidine residue, role in ATPase activity of *Amphibacillus xylanus*, 9
- Hydrogenase genes, distribution in respiration of *Anacystis nidulans*, 253
- Ice nuclei expression, in *Erwinia herbicola*, phosphate starvation and low temperature induces, 370
- Immunomagnetic beads (EMB), *Giardia muris* cysts in environmental waters separated by, 107
- Indole-3-pyruvate decarboxylase (*idpC*) gene, from *A. brasilense* Sp7, sequencing and functional analysis of, 327
- Interleukins  $\beta$ , 6, *Ira*, *P. gingivalis* biofilm degradation of, 216
- Internal transcribed spacer 2 (ITS2), region of *Acremonium obclavatum* isolates, comparison of RFLP patterns of rDNA containing, 70
- of *Candida* species, sequence analysis of, 63
- Isopropyl- $\beta$ -D-thiogalactopyranoside (IPTG) inducible promoters, effect of *lacY* gene on induction of, 341
- Lactobacillus delbrueckii* subsp. *bulgaricus*, effect of ethanol on viability and  $\beta$ -galactosidase activity of, 202
- Lactobacillus delbrueckii* subsp. *lactis* CNRZ 326, restriction/modification system in, 2711
- LacY* gene, role in induction of IPTG inducible promoters, 341
- Lectins, cell-surface, detected in *Azospirillum* spp. strains, 241
- Leucocin B-TA11a, effect on *Listeria monocytogenes*, 266
- Leuconostoc oenos* strains, lysogeny and induced bacteriophages of, 365
- Listeria monocytogenes*, antimicrobial activity of leucocin B-TA11a on, 266
- Listeria monocytogenes* strains, nucleotide sequence differences in virulence-associated genes of, 309
- Lysogeny, of *Oenococcus oeni* (*Leuconostoc oenos*), 365
- Maize bran, *Bacteroides ovatus* V975 fermentation of, 90
- Marine sediment, effect of exposure to mercury on the bacterial community in, 291
- Mercury contamination, effect on bacterial community in marine sediment, 291
- Methionine auxotrophs, of *Pseudomonas aeruginosa* from cystic fibrosis, genetic events leading to, 190
- Methylobacterium* sp. *RXM*, effect of molybdenum and tungsten on formate dehydrogenase activity of, 337
- Mosquito larvicidal toxin, sandwich ELISA for study of, 152
- MS2 bacteriophage, low-frequency EMF alter replication cycle of, 298
- N*-acetyltransferase (NAT), activity in *P. aeruginosa*, 353
- NaOH-SDS solubilization, *Clostridium perfringens* cell volume determined by, 131
- Nif factor, localized on plasmid in *Rhizobium* sp S<sub>2</sub>, 36
- N,N'*-dicyclohexylcarbodiimide (DCCD), effect on K<sup>+</sup> uptake by *Enterococcus hirae*, 114
- Nod factor, localized on plasmid in *Rhizobium* sp S<sub>2</sub>, 36
- NodABC-lacZ fusion, host specificity of cowpea miscellany *Rhizobium* spp. determined by, 361
- Nucleotide sequence analysis, of virulence-associated genes of *L. monocytogenes* strains, 309
- Oat bran, *Bacteroides ovatus* V975 fermentation of, 90
- Oenococcus oeni* strains, lysogeny and induced bacteriophages of, 365
- Oral microorganisms antimicrobial activity of ethanolic extract of propolis on, 24
- effect of chlorhexidine gluconate on, 13
- Osmotic stress
- Bacillus subtilis* sporulations at stage II inhibited by, 75
- envelope composition of *Bacillus subtilis* during, 55
- Paecilomyces carneus*, amidase and carboxamidase activities of serine carboxypeptidase from, 41
- p*-aminobenzoic acid, as substrate for *N*-acetyltransferase activity in *E. coli*, 125
- Papaya bunchy top disease, rickettsial relative associated with, 80
- Pasteurella haemolytica*, cross-protection studies in goats with three serotypes of, 207
- Pasteurella multocida*, serotype A encapsulation and lipoprotein content of, 274
- p*-chloromercuribenzoic acid, ATPase activity of *Amphibacillus xylanus* inactivated by, 9
- PCR amplification, *Giardia muris* cysts in environmental waters detected by, 107
- PCR-amplified 16S rDNA, digested with *HhaI*, role in separating *Photobacterium* and *Vibrio* strains, 171
- Perileucoptera* spp., susceptibility to *B. thuringiensis*  $\delta$ -endotoxins, 175
- Photobacterium* strains, RFLP patterns of PCR-amplified 16S rDNA gene digested with *HhaI* separate *Vibrio* strains from, 171
- Plodia interpunctella*, spore coat protein synergizes *B. thuringiensis* crystal toxicity for, 278
- Porphyromonas gingivalis* cytokine degradation by biofilms of, 216
- hemin regulation of hemoglobin binding by, 102
- Prevotella ruminicola*, transcriptional regulation of *recA* gene of, 259
- 1,2-Propanediol, glycerol-dependent utilization by *D. fructosovorans* and *D. carbinolicus* of, 283
- Propolis, ethanolic extract of, *S. mutans* growth and glucosyltransferase activity inhibited by, 24
- Protein assays, *Clostridium perfringens* cell volume determined by, 131
- Proteus* spp., role of filth flies in greyhound kennels in spread of, 164
- Providencia* spp., role of filth flies in greyhound kennels in spread of, 164
- Pseudomonas aeruginosa* biotransformation of 2,4,6-trinitrotoluene by, 45
- from cystic fibrosis, methionine auxotrophy in, 190
- N*-acetyltransferase activity in, 353
- Pseudomonas fluorescens*, role of *lacY* gene product in induction of IPTG inducible promoters studied in, 341
- Pseudomonas* spp., role of filth flies in greyhound kennels in spread of, 164
- Psychrotrophic bacteria, from constantly warm tropical environment, 148

- Pulsed-field gel electrophoresis (PFGE)*, genome of virulent and avirulent strains of *R. fascians* resolved by, 302
- Randomly amplified polymorphic DNA (RAPD)*, *Enterococcus* species identified rapidly by, 332
- recA* gene, of *Prevotella ruminicola*, transcriptional regulation of, 259
- Restriction fragment length polymorphism (RFLP)*, *Photobacterium* and *Vibrio* stains separated by, 171
- Restriction/modification system*, in *L. delbrueckii* subsp. *lactis* CNRZ 326, 271
- Rhizobium* sp. *S<sub>2</sub>*, localization of Nod, Nif, and exopolysaccharide determinants on large plasmid in, 36
- Rhodococcus fascians* strains, pulsed-field gel electrophoresis analysis of genome of, 302
- 50S Ribosomal subunit formation*, in *S. aureus* cells, macrolide antibiotics inhibition of, 119
- Rickettsia*, papaya bunchy top disease bacterium associated with  $\alpha$ -1 subgroup of *Proteobacteria* of, 80
- Ruminal microorganisms*, effect of chlorhexidine diacetate on fermentation of, 348
- Salmonella enteritidis*, growth, survival, characterization of *cspA* gene in, 29
- Salmonella* spp., role of filth flies in greyhound kennels in spread of, 164
- Schizaphis graminum*  
leucine gene plasmid copies in *Buchnera* endosymbiont in, 238  
sequence analysis of *B. aphidicola*, endosymbiont of, 158
- Selenomonas ruminantium*, xylooligosaccharide utilization by, 183
- Serine carboxypeptidase*, from *Paecilomyces carneus*, action on carboxy-terminated amidated peptides, 41
- Sigma factors*, in *Bacillus subtilis*, osmotic strength impedes activation of, 75
- Small acid-soluble spore proteins (SASP)*, in *B. thuringiensis israelensis* and *B. sphaericus*, role in spore tolerance, 220
- Soil contamination*, microbial growth steady-state infiltration model in study of, 136
- Sonication mutanolysin treatment*, *Clostridium perfringens* cell volume determined by, 131
- Spore coat protein*, *B. thuringiensis* crystal toxicity for Indianmeal moth synergized by, 278
- Staphylococcus aureus*, azithromycin and clarithromycin inhibition of 50S ribosomal subunit formation in, 119
- Staphylococcus* sp., biotransformation of 2,4,6-trinitrotoluene by, 45
- Streptococcus bovis* JBI, effect of chlorhexidine diacetate on growth and L-lactate production of, 348
- Streptococcus mutans*, effect of propolis on oral activity of, 24
- Streptococcus thermophilus*, effect of ethanol on viability and  $\beta$ -galactosidase activity of, 202
- Synechococcus* PCC 6301, pore-forming proteins isolated from outer-membrane of, 321
- Transgenic perennial crops*, resistant to endocarpic insects, model for, 175
- 2,4,6-Trinitrotoluene, aerobic bacteria biotransformation of, 45
- Vibrio cholerae* O139, serological reactivity to 18.7-kDa antigen of, 196
- Vibrio* strains, RFLP patterns of PCR-amplified 16S rDNA gene digested with *Hha*I separate *Photobacterium* strains from, 171
- Wheat bran, *Bacteroides ovatus* V975 fermentation of, 90
- Wolbachia*, transovarial transmission in *Aphytis* of, 1
- Xylooligosaccharides*, *Selenomonas ruminantium* fermentation of, 183
